Grand Total Score (Add totals from sections A, B, and C)	_____

The Grand Total Score will help you and your practitioner decide if your health problems are yeast-connected. Scores for women will run higher because seven items apply exclusively to women, while only two apply exclusively to men.

- Yeast-connected health problems are almost certainly present in women with scores over 180 and in men with scores over 140.

- Yeast-connected health problems are probably present in women with scores over 120 and in men with scores over 90.
- Yeast-connected health problems are possibly present in women with scores over 60 and in men with scores over 40.
- Scores of less than 60 for women and less than 40 for men indicate that yeast are less apt to cause health problems.
